# The First IEA SHC Solar cooling Chinese conference

A unique occasion to mix CHINESE EXPERIENCE

... and International Expertise and Experience

Quick facts :

**A lot of Chinese chillers and collector developments**

**A lot of results from IEA task 48 results usable by Chinese experts**

**Commercial ready-to-be used tools and products**

**Big stimulation from Environmental concerns & competitors (PV)**

**Very important margins to start a real solar cooling market..**

# The First IEA SHC Solar cooling Chinese conference

## What about making this *Rendez-vous* ... periodic ?

- 6<sup>th</sup> OTTI conference in Italy

24-25/09/2014

<http://www.solaircon.com/>

- SHC 2015 conference in Turkey

2- 4/12/2015

<https://www.shc2015.org/home.html>

6<sup>th</sup> International Conference  
**Solar  
Air-Conditioning**

Rome Airport, Italy  
Thursday, September 24<sup>th</sup>, 2015  
Friday, September 25<sup>th</sup>, 2015

International Conference on Solar Heating and Cooling for Buildings and Industry

### SHC 2015 CONFERENCE

DECEMBER 2-4  
ISTANBUL, TURKEY

Home | Conference Topics | Venue / Travel | Contact

#### Chairman's Message

Climate heat represents over 50% of the final energy consumption, with serious implications for energy security and energy-related CO<sub>2</sub> emissions. An effort to replace fossil-generated heat with renewable energy sources are strongly gaining momentum, solar heat could make a significant impact both on strengthening energy security and leading climate change. Although, Solar Heating & Cooling is still only making a modest contribution towards meeting the world's energy demand, the recent EU roadmap clearly foresees that solar energy could produce annually more than 10% of the total energy demand in Europe.

#### Welcome to SHC 2015 Conference!

The 2015 Solar Heating and Cooling for Buildings and Industry conference is the premier annual event for solar professionals in heating and cooling applications. SHC 2015 will be in Istanbul, Turkey from December 2-4, 2015 and bring researchers, market operators and industry to the bridge between two continents. The conference program will bring together the latest developments in solar heating and cooling and highlight local market success. Turkey is the largest solar thermal market in Europe and solar is an integral part of Turkey's sustainable energy roadmap.

A conference of the IEA, Turkey, Middle East and Central Asia

Local Host:      

Organized by:
